

LIGHTING CLEAN & CARE

Let it shine safely! All it takes is a little care.

STRUCTUBE
j'adore!

Visit your product's page at www.structube.com for detailed care and guidance instructions, or contact our Customer Service team.

EVERYDAY CARE

A little dusting = a whole lot of glow.

- Turn off the power before cleaning.
- Wipe fixtures regularly with a soft, dry cloth.
- Use a microfibre cloth to gently remove dust from shades, bulbs and metal parts.

BULBS & BRIGHTNESS

Shine smart.

- Replace bulbs only when the fixture is completely cool.
- Never exceed the maximum wattage indicated on your product.
- Remember: wattage = energy consumption
lumens = brightness.

SAFETY FIRST

A little caution keeps the spark alive (not the other way around).

- Never clean lighting while it's plugged in or switched on.
- Avoid using moisture or sprays directly on the fixture.
- Keep lamps and pendants away from curtains or textiles to reduce fire risk.

Note: Structube does not endorse any specific cleaning or electrical products. Always turn off power before cleaning or installation and consult a qualified professional if you're unsure. Some lighting items are intended for indoor, dry locations only; if used elsewhere, ensure they are appropriate and maintained safely.

INDOOR USE ONLY

Let outdoor lighting light up the exterior. This one stays in!

- Structube lighting is intended for dry, indoor spaces only.
- Avoid bathrooms, outdoor patios, and high-humidity areas unless specifically rated for them.

INSTALLATION TIPS

If in doubt, leave it to the pros.

- Make sure mounting hardware is secure and appropriate for your ceiling or wall type.
- For more complex pendants or chandeliers, we highly recommend professional installation.

LOVE IT LIKE IT LIGHTS YOUR LIFE

Clean fixtures = brighter rooms.

A little care will keep your lighting beautiful and functional for years.

Thank you for making Structube part of your home!
